SF Services – SFS640 Foil Slitter / Rewinding Unit

This foil cutter will cut foil to precision tolerances, using this slitter you would save on waste foil, savings between 3mm – 10mm each width.

Design of the equipment has been kept simple, but allows stable accurate rewinding.

Slitting is achieved by being able to place the knife at the front and the rear of the foil roll, using a securely mounted blade holder. This prevents left and right movement whilst slitting.

The drive system uses an inverter providing total and stable speed control.
