Heidelberg Cylinder KS, KSB, S, SB, SBG, SBB & SBD Foiling Press Heater Plates

SF Print Services heated bed plate assemblies are a unique design, manufactured specifically for Heidelberg range of cylinder foiling machines.

Made from high grade materials and machined to high tolerances, we have been making these heater plates to our own designs for over 30 years and have many very satisfied customers, we can supply various thickness plates and power connections for your local supply.

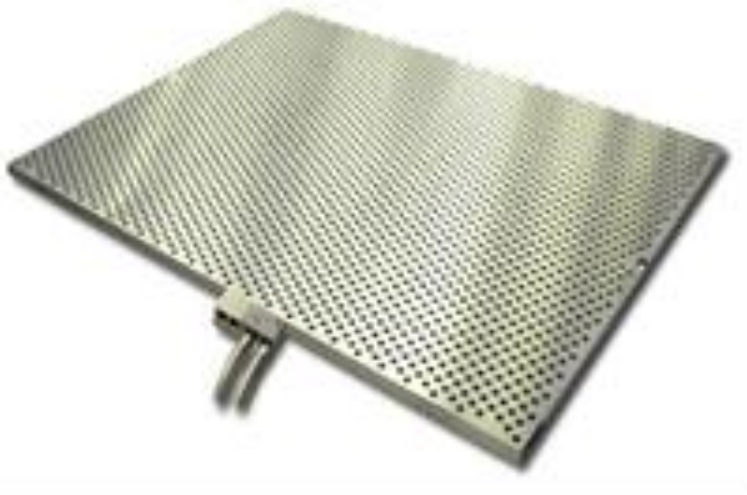

All our honeycomb heater plates are made from high grade steel which performs exceptionally well under loaded running conditions and remains stable in both shape and size during operation.

These chase plates come with the toggle Hook honeycomb formation as standard to fixate your dies in place. Bunter Fixing style plates are available – please enquire

Contact info@sfservices.com for a full list of available foiling and embossing plates and consumables

Heidelberg Cylinder Press

Low Profile Toggles design

- Unique design, manufactured specifically for the Heidelberg Cylinder Press
- The Honeycomb / Bunter Hole form bed is made from high grade steel
- Performs exceptionally well under loaded running conditions
- Remains stable in both shape and size during operations
- Four individually heated zones (2 Optional)
- Each zone has one temperature sensing point allowing for total control of heat distribution across the whole bed
- Uses toggle hooks or Bunter fixings to secure dies in position
- Toggle hook fixings provide accurate die positioning and micro adjustments
